WORK AND LEADERSHIP EXPERIENCE

Zoom Monitor and Program Assistant | NYU IT
Aug. 2020 - Present, Remote
- Assist faculty with Zoom functions, including breakout rooms, recording, and screen sharing, as a meeting host or alternative host
- Troubleshoot and resolve video and audio issues by providing instructions to participants through the chat, communicate with my team about unresolved problems and bugs
- Suggest features for efficient teaching in remote/hybrid courses
- Edit captions for videos used by NYU Wagner's Online MHA program, increasing accessibility and clarity of material for students

Director of Marketing | The Data Science Club at NYU
Oct. 2021 - Present, New York, NY
- Efficiently delegate marketing tasks through administering weekly meetings and maintaining an organized marketing calendar
- Facilitate quick and constant communication with other committees in order to publicize all club events and opportunities in detail
- Promote the club's student-run blog by creating Instagram story graphics with Canva and writing professional LinkedIn posts
- Created a marketing timeline and drafted emails for the club's 2022 Datathon event to present to our partners at Rockstar Games

Office Assistant | NYU Department of Chemistry
Dec. 2019 - June 2020, New York, NY
- Processed major/minor applications and registration forms, referring students with questions to the appropriate resources
- Fulfilled administrative duties for faculty, including recording of sensitive information such as exam scores and course grades
- Maintained constant communication with supervisors and colleagues about task progress and completion

PROJECTS

- Nutritional label for a decision system that predicts loan default risk
- Analysis of NYC middle school data from NYC Department of Education regarding specialized high school admission
- Data and regression analysis of Spotify data for relationships between song qualities such as valence and danceability
- Expanded resume website, which includes a portfolio where the above projects can be viewed: erinchoi2001.github.io
- Various web games combining server and client-side technologies

Coding languages:
Python (numpy, pandas, matplotlib), Java, JavaScript, PHP

Database management:
SQL (PostgreSQL and SQLite), MongoDB, exposure to Cypher in Neo4j
